

Scholastic Reading Counts

Grade 2 - 6 ONLY

The purpose of the Reading Counts Program is to encourage children to practice reading. As with any activity, practice is needed for improvement. The program is to be used as a supplement to the teacher's classroom reading program. There are three basic steps the child needs to do for successful participation in the Reading Counts program.

1. **The child chooses a book to read that is part of the Reading Counts program and is in the child's independent reading level.** To help determine a child's independent reading level the Scholastic Reading Counts program comes with a computerized reading test known as SRI, Scholastic Reading Inventory. Using the results of the test, the teacher then determines the independent reading level and informs the child of his/her book level. The child chooses an appropriate book and reads it. Although an abundance of wonderful children's literature is available, not all books are part of the Reading Counts Program.
2. **The child reads the book for comprehension (understanding of the story).** It is recommended for lower reading level books that the child independently reads the story at least two times, prior to taking a quiz. Asking your child questions is one of the best forms of increasing reading comprehension. Questions like . . . What is the story about? What is the setting? What is your favorite part of the story and why? Who is the main character? Are the characters real or make-believe? How do you know? To aid in comprehension, the child needs to discuss the story either mentally or verbally. Knowing the name of the author is also important.
3. **At school, the child takes a computerized quiz of 10 comprehension questions. Points will be awarded if the child answers at least 7 out of 10 questions correctly.** Each Reading Counts quiz will ask 10 multiple choice questions randomly chosen from a pool of 30 questions. Two students sitting side by side taking a quiz on the very same book, would take completely different quizzes. Students are told at the end of the quiz if they passed. Quizzes can only be taken at school. Each book is worth a certain amount of points. Once the quiz is complete, students can check their progress to see how many points they have.
